ICF Project Description (brief description using theory of change model):

1 - What is the problem you are trying to solve? Despite the presence of a range of falls support service across key stakeholders, the current gap in falls management coordination has resulted in no clear pathway for patients who have or who are at risk of falling to access the appropriate support in the timeliest manner to meet their needs.

2 - What long-term outcome/change are you hoping to achieve? A robust, integrated falls pathway that helps identify, risk stratify and manage people at risk of falls or who have fallen, reduce hospital admissions and readmissions, providing a rapid response in people's homes to maintain independence and support earlier identification of physical and mental health needs, including symptoms of dementia.

3 - Who is your key audience? "Older people with complex needs and long term conditions" - It is highly likely that the majority of people requiring support will be over 65: currently at risk of falls, demonstrating symptoms of frailty, have poor mobility, presenting with multiple conditions and those patients requiring medication review.

4 - How will you reach them? Recent engagement events have shown that the development of a falls pathway is one of the top three priorities identified by stakeholders to better support the population of Pembrokeshire. GP Clusters, WAST, Local Authority, Fire Services, Acute, Community and Primary Care Services all agreed that there is a clear demand for a Falls Pathway which once established and operational would be fully utilised by all services and staff supporting older people in the community.

5 – What resources are available to support? In Pembrokeshire, there are already specialist teams who will be able to provide easy access to information and data for potential patients. In addition, there are geriatric consultants who will be able to provide clinical supervision, existing GP falls registers in the county and a therapy falls task force who can contribute to the development of the pathway.

6 - What activities will bring about the change?

- Recruitment of:
 - 1.0 WTE Falls Co-Ordinator Band 4
 - 2.0 WTE Falls Clinical Assessors (Therapist or Nurse) Band 7
 - 1.0 WTE Falls Health Care Support Worker Band 3
- Scoping and mapping of existing services
- Agreement of how to address gaps identified
- Setting up a falls steering group

How does your project address your population needs assessment and area plan? Across Wales, it is accepted that services for older people need to change to match the predicted future demand. The WWCP population needs assessment highlights that this population increase will result in significant and increasing pressure on acute services as the risk of being admitted to hospital increases with age; a problem exacerbated by the rural nature of Pembrokeshire with often frail older people living in isolated communities with minimal support.

The recruitment of a Clinical Frailty Coordinator will provide the capacity to join up existing services into an integrated falls pathway. This meets the following WCCP Area Plan overarching theme eight:

“OR8 We need an integrated approach to commissioning and delivery of services and should look to pool resources where possible to ensure we make best use of available budgets and join services up at the point of delivery”

Project outcomes and impacts

What Population level indicators/measures is your project seeking to address? * please select from national outcome/performance management framework

- Citizens understand what care, support and opportunities are available and use these to help them achieve their well-being
- Citizen's individual circumstances are considered
- Citizens get the right care and support, as early as possible

Tell us how you will measure/understand the impacts of your project?

| | |
|--|--|
| <p>How Much? (outputs)</p> <p>Theme 2:</p> <ul style="list-style-type: none"> - Number/percentage of supported turnaround at the front door of acute hospitals - | <p>How Well? (quality)</p> <ul style="list-style-type: none"> - We will use case studies and the Most Significant Change (MSC) technique for gather stories to details the experiences of service users and staff. |
| <p>Difference made? (impact)</p> <ul style="list-style-type: none"> - Citizens understand what care, support and opportunities are available and use these to help them achieve their well-being - Citizen's individual circumstances are considered - Citizens get the right care and support, as early as possible | |

Tell us how you intend to evaluate the following aspects of your project (please refer to ICF guidance)

| | |
|--|---|
| <p>Impact Evaluation (How will you measure/understand the outcomes that have been achieved by your project?)</p> | |
| <p>Process Evaluation (How will you evaluate the system & process changes delivered by your project e.g. integration, co-production, social value?)</p> | <p>The initial mapping and scoping exercise will provide a baseline to measure future progress against.</p> |

| | |
|---|--|
| <p>Economic Evaluation (How will you evaluate the cost benefits/cost avoidance delivered by your project?)</p> | <p>Admission avoidance rates due to the successful implementation of the falls pathway will provide data that can be calculated to develop cost benefits of the project.</p> |
| <p>Qualitative Evaluation (How will you capture the experiences of service users/staff/communities?)</p> | <p>We will use case studies and the Most Significant Change (MSC) technique for gather stories to details the experiences of service users and staff.</p> |

Exit Strategy

Tell us about your exit strategy for the project (post 2021):

This project is for a fixed term coordinator to develop and implement a clear falls pathway joining up existing services in the community. Once the pathway is established, it will link with the Transforming Clinical Services ambition for providing more support in the community whilst also becoming a core part of the intermediate care response in the county.
